SUMMARY

Full-stack Web & AEM Developer with 3+ years of experience building scalable, content-driven applications. Proven impact across RTL enablement, system migrations, DAM asset optimization, and developer tooling. Adept at leading UI modernization and scripting workflow automation. Certified across 9 Adobe domains; currently pursuing an MSc in IoT Systems Engineering at UCL.

CORE SKILLS

- **Frontend:** JavaScript, React, HTML, CSS, Bootstrap
- **Backend:** Java, PHP, Node.js, Express, Servlets
- **Platforms/Frameworks:** AEM Sites (Cloud), Sling Models, OSGi
- **Data/DBs:** Firebase, MySQL, MongoDB
- **Tools/Infra:** GitHub, Google Tink, GCP KMS, systemd
- **IoT/Devices:** Arduino, Raspberry Pi
- **Other Languages:** Python, Flutter, JSON, XML

EXPERIENCE

Cosysense Ltd - IoT Intern

Duration: January 2026 to Present

Tech Stack: Tailwind CSS, Shadcn, Vite, ReactJS, Leaflet

- Spearheaded UI/UX development for an internal Admin dashboard within a two-person agile team.
- Migrated spatial mapping components to React Leaflet, engineering a custom coordinate system to seamlessly integrate and manage over 20 distinct IoT device contexts directly on the floor plan.
- Bolstered platform security by integrating AWS Cognito for robust identity management, secure credential handling, and self-service password resets.
- Translated complex IoT data models into intuitive user interfaces, prioritizing scalable architecture and code maintainability.
- Leveraged Brick ontology principles to help standardize the organization and semantic assignment of hardware data points.

Jatpoint - Full Stack Application Developer

Duration: December 2025 to Present

Served as the Lead Architect for the rapid 8-week end-to-end development of the platform's Phase 2 overhaul.

- Engineered a high-performance cross-platform Flutter frontend and a scalable, cloud-native Node.js backend deployed on AWS (EC2, RDS, S3).
- Established automated CI/CD deployment pipelines using GitHub Actions and Docker, drastically reducing integration times for staging environments.
- Resolved complex SSL configuration roadblocks for AWS RDS and integrated AdminJS, ensuring secure and streamlined backend database management.
- Implemented secure Stripe payment gateways alongside a real-time digital reward redemption system to drive user engagement.
- Developed robust, location-based verification services, utilizing radial geofencing logic to securely validate user attendance at physical events.
- Architected the 'JatScore' engine, a dynamic 3-axis radar chart algorithm designed to visualize user engagement, spending, and social influence in real time.

IBM India Private Limited - AEM Sites Application Developer

Duration: November 2023 to July 2025

Client: IBM.com

- Led roughly 50% of all RTL enablement code changes for IBM.com in a 3-person team, and proposed alternative component implementations to de-risk project timelines.
- Built a Node.js tool to map dependencies across 240+ AEM components, cutting issue-triage time by 70%; complemented with Python automation that reduced planning by 1 week.
- Led Carbon Design System v2 UI modernization for an 8-person team; mentored developers in CSS/Sass and unblocked three complex UI components.
- Published an AEM URL Switcher Chrome extension to compare the same page across multiple environments/versions, accelerating multi-environment testing.
- Customized three AEM Commons DAM asset reports with dynamic parameters to support Adobe Cloud content operations.

IBM India Private Limited - SAP BI AMS BW Consultant

Duration: September 2022 to October 2023

Client: Volkswagen Financial Services

- Cut average incident first-response time by 80% by introducing Python script automation.
- Identified a pattern of recurring issues and proactively escalated it, creating an 8-hour mitigation window that prevented a major P1 incident.
- Reduced average ticket closure time by more than 24 hours.

College of Engineering - Guindy - Full Stack Developer Intern

Duration: July 2022 to August 2022

Client: Center for Academic Courses, Anna University

- Digitized affiliated college fee records and enabled self-service status checks, with options to export data to Excel/PDF.
- Developed a PDF Generator tool to template official letters, reducing manual work and errors by 90%, and transferred know-how to staff for adoption.

IBM India Private Limited - Associate Application Developer Intern

Duration: January 2022 to June 2022

- Completed SAP S/4 HANA 2.0 certification and gained exposure to a full project lifecycle.

Rishabh Software Private Limited, Vadodara - Machine Learning Intern

Duration: January 2020 to June 2020

- Built a Time & Expense Tracker application and prototyped a machine-learning model on Identification of Intoxicated Faces.

Freelance Web Developer - Freelance Web Developer

Duration: January 2018 to December 2022

Part-time (during BCA & MCA)

- Built and maintained websites and small web apps for local/small-business and community clients (CMS + lightweight custom features + deployment support).
- Managed end-to-end delivery (requirements, content, basic SEO, hosting), funding a portion of living/tuition expenses.

SELECTED PROJECTS

- **Low-Cost Automation of Existing Electric Devices (MycroLinks):** Flutter, Dart, Firebase, Arduino - Mobile app + NodeMCU (ESP8266) with real-time control and state sync.
- **Fingerprint Attendance Management System:** Java Web, Python, Raspberry Pi, Arduino, MySQL, JS/CSS - Distributed biometric devices with central admin portal; CSV/Excel exports and audit logs.
- **Event Enrolment & Online Payments (Deepwoods MCC):** PHP, MySQL, InstaMojo, jQuery, SEO, Bootstrap - Enrolment, ticketing, and payment confirmations with dashboard and exports.
- **Android Password Manager:** Android, Google Tink, GCP KMS, Node REST API, Firebase - On-device encryption with cloud-managed keys; Secure credential sync.
- **Classroom Assignment Evaluator:** Flutter, Firebase - Gemini-based LLM for automated assignment evaluation and feedback using teacher-defined criteria.

EDUCATION

M.Sc Systems Engineering for the Internet of Things

2026

University College London

Coursework: Designing Sensor Systems, Real-World Multi-agent Systems

Master of Computer Application Cyber Security and Internet of Things

2022

Anna University, College of Engineering - Guindy | CGPA: 8.5 | First Class with Distinction and Honors

Coursework: Advanced Java, Machine Learning

Bachelor of Computer Application Advanced Java, Machine Learning

2020

Maharaja Sayajirao University of Baroda | CGPA: 7.5 | First Class with Distinction and Honors

Coursework: Android Development, Networking

LEADERSHIP & VOLUNTEERING

- **Volunteer Youth Mentor – Crossroads (2024-01-01–2024-12-31):** Relationship-based youth mentoring & community events
- **MCA Class Representative – Anna University (2020-03-01–2022-03-31):** Elected liaison between cohort and faculty; timetable, attendance, and student welfare

CREDENTIALS

- AWS Certified Cloud Practitioner
- Adobe Certified Expert - Adobe Experience Manager Sites Developer
- Adobe Certified Professional - Adobe Experience Manager Forms Backend Developer
- SAP Certified Development Specialist - ABAP for SAP HANA 2.0
